Logistics and Supply Chain Management

Logistics Management deals with efficient and effective management of day-to-day activity in producing the company's finished goods and services.

Supply Chain Management (SCM) refers to the coordination of production, inventory, location, and transportation among the participants in a supply chain to achieve the best mix of responsiveness and efficiency for the market being served.

Why a Certification in Logistics and Supply Chain Management?

Logistics and Supply Chain are booming industries, full of opportunity and growth. Without logisticians, manufacturing and other businesses would have a very hard time succeeding. Logistics keeps the supply chain flowing, which in return, keeps you employed. Logistics is definitely a field with limitless potential. Logistics careers pay well and there are job opportunities for every education level. Logistics is a diverse industry with a wide variety of sub-sectors, keeping your daily schedule both interesting and challenging. You will learn about many different industries and how they function. Because logistics has so many facets and levels, opportunities for advancement are always available.

Eligibility

Students who are passionate about Logistics and Supply Chain and working professionals looking to improve their skillset or are contemplating on a career change.

About WHIZeCargo Training Centre

WHIZeCargo Training Centre was established as a result of our vast experience in developing customised ERP solutions for various Logistics and Supply Chain businesses. The ERP is known as WHIZeCargo. Some of the industries we have provided solutions for include Freight Forwarding Companies, Warehousing/Logistics Companies/3PL, NVOCC, Airlines (Cargo) & Airline Agents, Transport Companies, Shipping Lines/Agents, RO/RO Vessel Operators, Distribution Companies and Ship Owners. Our vision is to provide quality training at an affordable price.

WHIZeCargo Training Centre and WHIZeCargo are ventures of WHIZTEC, where IT wizards work.

- Learn the documentation procedures in Import/Export and other related shipping procedures.
- Gain financial and accounting knowledge used in logistics and shipping.
- Customer service operations in Logistics and Supply Chain Management.
- Learn to operate WHIZeCargo ERP for Logistics and Supply Chain.

Job Opportunities

The Indian Logistic Industry is growing steadily led by e-commerce penetration, economy revival, proposed GST implementation and government initiatives such as “Make in India”, National Integrated Logistic Policy, 100% FDI in warehouses and food storage facilities. This in turn has generated a lot of job opportunities for logistics and supply chain professionals throughout India.

The International Container Transshipment Terminal at Vallarpadam which is expected to handle 3 million containers per year at full operational capacity and the International Cargo Terminal at Cochin International Airport has seen an increase in the logistical activities in Kerala. This has led to an increase in the demand for skilled logisticians in Kerala.

The scope for Logistics and Supply Chain professionals in the GCC countries is huge. In UAE, Dubai has transformed itself into one of the world’s key re-export hubs. The Jebel Ali Port in Dubai which operates as a free zone is home to around 5500 companies from around 120 countries. The Emirates Airways based in Dubai has made a name for itself in air cargo transportation and the extensive facilities available at Cargo Village have generated a lot of opportunities for logisticians. With the trend of oil producing countries such as Oman, Qatar, Saudi Arabia, Bahrain and Kuwait to branch out into different business areas have opened up a lot of jobs in the logistics and supply chain field.

Placement Assistance

Placement assistance would be provided to the students free of cost. Our parent company develops Logistics and Supply Chain related software. Throughout the years we have developed a huge client base in India and abroad, particularly in the GCC countries. There are options for deserving students to be placed with the companies in India and GCC countries once they have completed the certification program.

WHIZeCargo ERP

WHIZeCargo is a web based comprehensive and advanced supply chain execution solution for Freight Forwarding, Shipping, 3PL and Fourth-Party Logistics (4PL) operations. Using market-leading technology, WHIZeCargo’s tightly integrated solutions enable users to lower costs and enhance profitability by collaborating with their customers and vendors across the supply chain. WHIZeCargo is a complete ERP system coupled with supply chain features.

WHIZeCargo software provides solutions for the following areas

Freight Forwarding

WHIZeCargo offers a comprehensive and fully integrated freight forwarding management solution that automates the entire business process of freight forwarding, logistics and transportation industries. The product is highly customisable, thereby enabling it to meet the specific needs of different companies. It covers domestic, air/sea/land mode freight forwarding as well as consolidation, custom clearing, NVOCC operations, imports, exports, transshipments, packing, shifting and warehousing.

Transport Management

Transportation Management System (TMS) delivers robust transportation planning, transportation procurement and execution capabilities to shippers and third party logistics providers. It integrates and streamlines transportation planning, execution, freight payment, and business process automation on a single application across all modes of transportation, from full truckload to complex multi-modal air, ocean, road, and rail shipments.

TMS module can be integrated with WHIZeCargo's Warehouse Management module to take care of normal warehousing or complex 3PL operations. Other modules integrated with TMS are Fleet Management, Document Management, Reverse Logistics, Live Reporting and Dashboard capabilities, EDI/XML/Web Services capabilities, Invoice Auditing and Reconciliation, WHIZeCargo Financials integration, multi-location Shipment Management, multi-carrier management (rates, service, destination, origin), consolidations, real time tracking/tracing, automation of processes and security.

Warehouse Management

WHIZeCargo Warehouse Management System (WMS) is an industrial-strength warehouse management software that empowers companies to gain control over customer service levels, warehousing costs, order turnaround time, throughput volumes, and most importantly, profit. WHIZeCargo WMS helps to ensure fast, accurate fulfilment through directed, optimized workflow, utilizing the most advanced wireless and bar code technologies, including RFID.

Yard Management

WHIZeCargo Yard Management Software (YMS) maximizes yard and warehouse efficiency by managing the flow of goods coming in and out of your yard. YMS can be used to plan, execute, track and audit all incoming and outgoing loads. With YMS, you get visibility into inventory sitting in trailers and are better able to manage, schedule, and record the arrival, placement, location, and status of trailers, trucks, containers, and their content.

Liner Agency Management

WHIZeCargo for NVOCC (Non-Vessel Operating Common Carriers)/Liner/Liner Agent module consists of Container Inventory, Agent Management and Costing modules. **Container module** allows various ways for adding equipment to the inventory including purchase, on-hire, one-time use etc. This module also includes repairs, claims and sales/off hire/one way buy off management. **Agent management module** consists of tariff and customer rate files, booking, container release, exports, BL drafting and printing, billing, imports,

transhipments, load lists, manifests, EDI generation, discharge lists etc. Container moves are automatically updated through the transaction entries which gives the user powerful equipment movement and ageing reports. **The costing module** takes care of the management of various tariff and BL amendments, demurrage/detention, local, destination, storage, haulage and other charges. This module also includes feeder operator payments and repair cost management.

Fleet Management Solutions (FMS)

WHIZeCargo provides customizable Fleet Management Solution (FMS) to drive efficiency and visibility down to the last mile. It optimizes resources and manages assets in different industries. WHIZeCargo FMS includes the following modules:

Asset Management
Operation Management
Financial Management

Compliance Management
Maintenance Management
Document Management

EDI & B-to-B APPLICATIONS

WHIZeCargo provides its customers business-to-business EDI and supply chain integration, synchronization and collaboration solutions. WHIZeCargo application can automate the internal and external data communication. It can automate the conversion of data between formats and facilitate communication between platforms.

Document Management

Web based Document Management System (DMS) provides industry standard document control, workflow and knowledge management system. DMS allows electronic checking and approval along with the electronic distribution of documents. WHIZeCargo DMS can function as a simple e-filing storage system with scanning, storing, sharing, indexing, archiving, retrieval, and accessing of original documents.

Customer Relationship Management

WHIZeCargo Customer Relationship Management (CRM) solution captures, manages and tracks every customer, partner and vendor interaction in a single system. With the ability to capture, analyse and act on customer intelligence, CRM customers can aggregate and analyse information across the business, giving them the insight to guide effective decision-making and more easily adapt to changing market requirements.

Financial Management

WHIZeCargo Financial (FA) modules include general ledger, accounts payable, accounts receivable, bank reporting, budgeting, fixed assets, cash flow management and reconciliation. The financial module is integrated with sales and operational modules with data gets updated seamlessly displaying the most up-to-date information at all times.

Human Capital Management

WHIZeCargo Human Capital Management (HCM) offers comprehensive human resource management capabilities, from workforce management to compensation and talent management. WHIZeCargo HCM streamlines and integrates essential workforce processes such as employee administration, document management, organizational management, time and attendance management, leave and travel management, benefits, payroll, Employee Gratuity Fund (EPF) calculations and legal reporting.

Supply Chain Management

WHIZeCargo Supply Chain Management Solutions provide advanced tools and intelligence to drastically reduce supply management costs. WHIZeCargo delivers comprehensive solutions, expertise, and the support required for the success of supply organizations. WHIZeCargo has concentrated exclusively on helping companies streamline their supply chains to achieve lower costs, higher profits and happier customers. WHIZeCargo's solutions cover the entire supply management life cycle and the modules included are

Supplier Relationship Management
Transportation Management
Distribution Management
Demand Planning/Forecasting

Procurement/Purchase Management
Warehouse Management
Supply Chain Visibility
Inventory Optimization
